Luscious® Royale Piña Colada Lantana

Lantana camara 'Luscious Royale Pina Colada'

Height: 18 inches

Spread: 24 inches

Spacing: 18 inches

Sunlight: ○ ◐

Hardiness Zone: (annual)

Group/Class: Luscious Series

Description:

A beautiful bright and cheery, pollinator friendly variety producing attractive yellow and white blooms over dark green foliage; heat and drought tolerant with a mounded habit, perfect for sunny landscape locations or patio containers

Ornamental Features

Luscious Royale Piña Colada Lantana features showy cymes of white flowers with lemon yellow overtones and yellow eyes at the ends of the branches from early summer to mid fall. Its tomentose pointy leaves remain green in color throughout the year.

Landscape Attributes

Luscious Royale Piña Colada Lantana is a multi-stemmed annual with a more or less rounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and should not require much pruning, except when necessary, such as to remove dieback. It is a good choice for attracting bees, butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Luscious Royale Piña Colada Lantana is recommended for the following landscape applications;

Planting & Growing

Luscious Royale Piña Colada Lantana will grow to be about 18 inches tall at maturity, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Luscious Royale Piña Colada Lantana is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
