Height: 15 inches

Spread: 14 inches

Spacing: 10 inches

Sunlight: ○ ◐ ●

Hardiness Zone: 4a

Other Names: Coralbells, Alumroot

Group/Class: Carnival Series

Description:

Dainty bells rise from a compact mound of olive-green and silver leaves that have scarlet undersides; amazing contrast to other plants; greater heat and humidity tolerance; keep soil moist in heat of summer

Ornamental Features

Carnival Black Olive Coral Bells features dainty spikes of creamy white bell-shaped flowers rising above the foliage from mid spring to early summer. Its attractive crinkled lobed leaves emerge coppery-bronze in spring, turning olive green in color with curious scarlet undersides and tinges of silver the rest of the year.

Landscape Attributes

Carnival Black Olive Coral Bells is a dense herbaceous evergreen perennial with tall flower stalks held atop a low mound of foliage. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. It is a good choice for attracting hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Carnival Black Olive Coral Bells is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Carnival Black Olive Coral Bells will grow to be about 12 inches tall at maturity, with a spread of 14 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 10 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant performs well in both full sun and full shade. However, you may want to keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Carnival Black Olive Coral Bells is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
