Sunsatia® Cranberry Red Nemesia

Nemesia 'INNEMCRARE'

Height: 10 inches

Spread: 18 inches

Spacing: 12 inches

Sunlight: ○ ◐

Hardiness Zone: (annual)

Group/Class: Sunsatia Series

Description:

This variety produces cascading beautiful two toned red blooms from early spring right into fall; perfect for patio containers and hanging baskets; a low maintenance plant that is ideal for a pop of color all season long.

Ornamental Features

Sunsatia Cranberry Red Nemesia features dainty spikes of lightly-scented ruby-red pea-like flowers at the ends of the stems from late spring to mid fall. Its small pointy leaves remain green in color throughout the season.

Landscape Attributes

Sunsatia Cranberry Red Nemesia is a dense herbaceous annual with a mounded form. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and should not require much pruning, except when necessary, such as to remove dieback. It has no significant negative characteristics.

Sunsatia Cranberry Red Nemesia is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting
- Hanging Baskets

Planting & Growing

Sunsatia Cranberry Red Nemesia will grow to be about 10 inches tall at maturity, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain low and dense right to the ground. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Sunsatia Cranberry Red Nemesia is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
