Rockin'® Fuchsia Salvia

Salvia 'BBSAL00301'

Height: 3 feet

Spread: 30 inches

Spacing: 24 inches

Sunlight: ○ ◐

Hardiness Zone: (annual)

Other Names: Perennial Salvia, Meadow Clary, Meadow Sage

Group/Class: Rockin' Series

Description:

Stunning fuchsia flowers with black calyx bloom all season long; a beautiful addition to borders or beds with its dense and bushy form; looks fantastic in containers; heat and drought tolerant; great pollinators; low maintenance

Ornamental Features

Rockin' Fuchsia Salvia has masses of beautiful spikes of fuchsia flowers with black calyces rising above the foliage from late spring to mid fall, which are most effective when planted in groupings. The flowers are excellent for cutting. Its pointy leaves remain dark green in color throughout the season.

Landscape Attributes

Rockin' Fuchsia Salvia is an herbaceous annual with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees, butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Rockin' Fuchsia Salvia is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Container Planting

Planting & Growing

Rockin' Fuchsia Salvia will grow to be about 30 inches tall at maturity, with a spread of 30 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 24 inches apart. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Rockin' Fuchsia Salvia is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
