Height: 6 inches

Spread: 16 inches

Spacing: 12 inches

Sunlight: ○

Hardiness Zone: (annual)

Group/Class: Scopia Series

Description:

Dainty white flowers stand out on top of dark green, toothed foliage; a trailing series that performs wonderfully in hanging baskets, patio containers and garden beds; long blooming season, from spring until fall; deadhead to encourage new growth

Ornamental Features

Scopia Gulliver White Bacopa is covered in stunning white star-shaped flowers with yellow eyes along the stems from mid spring to late fall. Its small serrated round leaves remain green in color throughout the season.

Landscape Attributes

Scopia Gulliver White Bacopa is an herbaceous annual with a trailing habit of growth, eventually spilling over the edges of hanging baskets and containers. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and should not require much pruning, except when necessary, such as to remove dieback. It has no significant negative characteristics.

Scopia Gulliver White Bacopa is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover
- Container Planting
- Hanging Baskets

Planting & Growing

Scopia Gulliver White Bacopa will grow to be only 6 inches tall at maturity, with a spread of 16 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain low and dense right to the ground. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Scopia Gulliver White Bacopa is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. Because of its trailing habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
