Plant Height: 12 inches

Flower Height: 16 inches

Spread: 16 inches

Spacing: 10 inches

Sunlight: ○

Hardiness Zone: (annual)

Group/Class: Snaptastic Series

Description:

Vigorous plants with excellent branching and prolific, early flowering blooms; brightly colored flower spikes rise above medium green foliage in the spring and fall; strong, sturdy stems are great for freshly cut flower arrangements; pollinator friendly

Ornamental Features

Snaptastic Orange Flame Snapdragon has masses of beautiful spikes of lightly-scented orange pea-like flowers with salmon overtones and yellow eyes rising above the foliage from mid spring to mid fall, which are most effective when planted in groupings. The flowers are excellent for cutting. Its small pointy leaves remain green in color throughout the season.

Landscape Attributes

Snaptastic Orange Flame Snapdragon is an herbaceous annual with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and should not require much pruning, except when necessary, such as to remove dieback. It is a good choice for attracting bees and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Snaptastic Orange Flame Snapdragon is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Snaptastic Orange Flame Snapdragon will grow to be about 12 inches tall at maturity extending to 16 inches tall with the flowers, with a spread of 16 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 10 inches apart. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Snaptastic Orange Flame Snapdragon is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
